

Clear Choice® AT65

The NEW, universal clear application tape for maximum versatility & precision

Clear Choice® AT65 is an ultra-clear, high tack film application tape that provides exceptional performance and versatility for the widest range of sign applications. Simply put, AT65 is the tape you'll want to keep on-hand.

AT65's high tack adhesive system is especially well-suited for transferring small, high detail-cut graphics and vinyl films with tight liner release, such as Oracal 651 Intermediate Calendered Vinyl. An exceptionally clear film facestock allows for precise registration of multiple color overlays, while the rigid polypropylene film minimizes stretching for precise alignment of graphics.

Application

Small, High Detail Cut Graphics
Vinyl Films with Tight Liner Release
Multiple Color Graphic Overlays

Features

Higher Tack Adhesive
Easy Unwind
Exceptional Lay Flat Characteristics
Resists Tunneling and Curling

Benefits

Universal Performance for a Wide Range of Applications.
Extended Shelf Life Even After Lamination.
No Milky Residue when used for Wet Applications

Clear Choice® AT65

Clear Choice AT65 AT A GLANCE

Versatility: AT65 is designed for, and been tested to work with, gloss vinyls of the major brands.

Water Resistant: The unique polymerization process of the acrylic adhesive ensures a water resistant application tape.

Clarity: The transparency of the AT65 aids precise registration.

Easy Handling: The rigidity of the polypropylene film minimizes misalignment of application for easier installation.

Static Control: The superior Adhesive reduces static charges for easier lamination.

Even with its new higher tack adhesive, AT65 unwinds easily for trouble-free handling. The new, class leading adhesive improves anchorage, water resistance and overall performance. When used in wet applications, the adhesive stays bonded to the facestock, leaving no adhesive or milky residue after the application tape is removed.

Following lamination to plotter cut graphics, all Clear Choice® films lay exceptionally flat on exposed portions of smooth, non-embossed release liners and resist curling and tunneling. The adhesive is formulated to prevent build-up to vinyl graphics, even when they are stored for prolonged periods. Ideal for make and hold corporate graphics programs requiring batch-runs of commonly used graphics.

AT65 is complemented by the AT60n and AT75 clear films. The low tack AT60n is designed for transferring large letters and for protecting wide format digital prints. AT75 is a high tack tape for people who want a deeply embossed application film.
