

SIHL

INK COMPATIBILITY

3699 TriSolv™ PhotoArt is a 9 mil gloss wet strength photo paper that delivers exceptional image performance, black density, and color vibrancy on both solvent and latex printers. Its superior color reproduction, combined with a uniform gloss finish across both printed and unprinted areas, ensures impressive results.

This high-quality photo paper is designed to meet the demanding needs of professional printers, making it ideal for a wide range of high-volume printing applications.
