USCutter is proud to present the TITAN 2 vinyl cutter series as a high quality and affordable choice for professional sign makers and do-it-yourself vinyl cutting enthusiasts. The TITAN 2 cutter series is offered in 28, 53 and 68 inch models capable of a max cut length of 360 inches. With its variable speed and cutting force, the TITAN 2 is perfectly suited for cutting a variety of material including adhesive vinyl, window film, hard paperboard, sandblast stencil, mask material and much more.

# TITAN<sup>2</sup> PRODUCT FEATURES

## Product Features

- Laser registration for contour cutting function
- Carriage with 4 wheels
- USB interface
- Aluminum alloy construction, precision ABS sides
- All metal moving parts
- Mac & PC compatible USB and RS-232 connection
- Large LCD display & control panel for adjusting speed and cutting force
- Plug and Play - simple installation, no additional drivers necessary
- Cuts adhesive vinyl, heat transfer vinyl, cardstock, paint mask stencil, laminate, sandblast mask & low intensive reflective material
- Servo motor for quiet and accurate performance

## Included Items

- NEW Vinyl Cutter
- Floor Stand & Material Basket with all TITAN-2 models
- Design & cut professional software: Sure Cuts A Lot Pro
- Blade holder
- 3 TITAN blades, (1x60°, 1x45° & 1x30° blade)
- Pen holder (use to plot instead of cut)
- Stand assembly tools
- USB Cable
- 9-pin Serial Cable
- 2 Year Warranty
- FREE Lifetime phone support

## TITAN vs. TITAN 2

The TITAN 2 servo motor is quieter and more efficient than a comparable stepper motor which is part of what makes the TITAN 2 a professional's vinyl cutter. Servo motors are faster and more accurate but require more complex drive circuitry and positional feedback. To achieve this, servo motors maintain their torque rating at high speeds because they do not operate at maximum capacity, leaving power in its reserves. In addition to the back lit LCD, the TITAN 2 features illuminated buttons for easier reading. The TITAN 2 servo motor makes it faster, quieter, more accurate and able to cut thicker material.

## Quality Construction

TITAN 2 vinyl cutters are constructed to withstand rigorous use and are built tough from the inside out. From the aluminum alloy frame and ABS end caps to the double ball bearing blade holders, the TITAN 2 is built to last. MAC and Windows compatible with built in USB interface, the TITAN 2 machines are plug-n-play ready.

## Contour Cutting with Sure Cuts A Lot Pro (SCALPro) and Servo Motor

Contour cutting is simple with the included Sure Cuts A Lot Pro software and laser registration mark reading. The illuminated LCD screen and large control panel buttons makes programming the TITAN 2 vinyl cutter a breeze. Adjustable speed and force is available by the touch of a button which makes for ease of operation. The digital readout makes for accurate and precise settings.

**Included Software: Sure Cuts A Lot Pro (SCALPro) (\$199.99 value)**

Sure Cuts A Lot Pro is a professional-quality, extremely easy-to-use program that allows you to cut virtually any shape or design with your electronic cutting machines. This one-of-a-kind program gives you the ability to use your fonts, import custom artwork, and draw your own shapes! The possibilities are endless! This program offers new, state-of-the-art features that appeal to serious sign makers, in addition to all of the amazing features of Sure Cuts A Lot Version 3!

**Sure Cuts A Lot Pro Features:**

- PRO version's workspace can go up to 200"x200" (Version 3's maximum workspace size is 72"x72")
- In the PRO version, if you have an image that has many colors in it, you can easily isolate each color and cut them separately
- Print and cut capability (contour cutting) for USCutter supported machines (Laserpoint II, CE-5000)
- 3D-shadow (drop-shadow feature)
- In the PRO version, you can easily add extra cut lines that are designed to assist in weeding. This is very exciting, as few programs offer this feature!
- Drivers included for USCutter machines
- Works with your installed TrueType and OpenType fonts
- Works with thousands of free TrueType Fonts including Dingbat/Wingding Fonts
- Import various file formats, including SVG and PDF
- Drawing tools to draw and edit shapes
- Weld overlapping letters and shapes together
- Select styles, including shadow and blackout, to change the look of your letters and shapes with just a few clicks
- Auto-tracing feature to automatically convert images for cutting
- Create rhinestone templates
- Print & cut
- Cut additional shapes from the "Sure Cuts A Lot" Library
- WYSIWYG Interface - Exactly what you see is what you cut
- Available for Windows and Macintosh OSX
- Save and share your design layouts
- Free technical support and access to professionally made video training series

**System Requirements:**

- Pentium processor-based PC or compatible computer (Windows)
- Windows XP/Vista/7 (Windows)
- Intel based Macintosh (Mac)
- Macintosh OSX 10.4/10.5/10.6/10.7 (Mac)
- 512 MB of RAM or more
- At least 50 MB of available hard disk space
- USB Port 1.1 or 2.x
